Terry

I will follow up and get back to you

Thank you
Chris

Christine: The units have now been changed to mg/L. Which means the Screening level numbers are incorrect. Those are the values for ug/L. The actual results themselves seem to be in mg/L, but I can not confirm that. Also, all data published on the web site so far for water have been ug/L. If we post numbers in mg/L, that is going to start getting confusing to the public.

Terry,

Please see the message below requesting release of R6 surface water data. Upon your approval, this is ready to go to HQ for release authorization

Thank you

Chris
